

Examples of Industries Served

- Centrifuge Manufacturers
- Pellet Mill Manufacturers
- Heavy Machine Manufacturers
- Irrigation Equipment Manufacturers
- Tool and Die Manufacturers
- Food Service Companies
- Medical Equipment Manufacturers
- Medical Researchers

Case Study

Opportunity:

A Midwestern pharmaceuticals company approached Controlled Motions Dynamics to help create a more secure drug storage area. The company sought to keep addictive prescription drugs in a safe area.

Solution:

- CMDI designed and built an aluminum extrusion cage assembly using 80/20 (www.8020.net).
- The entry doors were electronically locked using Scientific Technologies (STI) safety products.
- The entry doors were interfaced with the facility's existing security card readers.
- A total of seven locks provided the company with moderate security measures for their stores of highly addictive prescription drugs.

The pharmaceuticals company was so pleased with the outcome of the project that it plans to work with Controlled Motion Dynamics on future projects.

Controlled Motion Dynamics can create solutions for a variety of opportunities.
